

Rugged charging dock for XCover Pro and XCover 6 Pro

Designed for enterprise, manufacturing, retail, and field applications

Portsmith's single slot charging dock is a rugged and reliable workhorse built for business—just like the Samsung XCover Pro that it's designed for.

Power is supplied to the handheld via pogo pins rather than through the USB-C port. This reduces wear on the USB-C port and is suitable for continuous use.

Simply plug the USB cable into any powered USB Type-A source, drop the phone into the dock, and start charging.

Part number

- PSD1XCP-01 (XCover Pro)
- PSD1XCP6-01 (XCover 6 Pro)
